

Daniel Barranquero

CLOUD SECURITY ENGINEER

josedanielbarranqueroortigosa@gmail.com · github.com/danibarranquero · linkedin.com/in/danibarranquero · Granada, Spain

EDUCATION

Universidad de Granada 2019 – 2025

Dual Degree in Computer Engineering and Business Administration

Google Cloud 2023

Digital Leader learning path, four badges

EXPERIENCE

Prowler Jan 2025 – Present

Cloud Security Engineer · Remote

- 528 commits merged since January 2025.
- Built the OpenStack and Okta providers end to end: SDK, checks, API, web UI, docs.
- Security checks across 15 cloud providers, from AWS and Azure to Okta and OpenStack.
- Extended Attack Paths, the graph chaining misconfigurations to critical resources.

Prowler Jun 2024 – Dec 2024

Intern Cloud Security Engineer · Remote

- 80 pull requests merged, from Google Cloud test coverage into new detections.
- Converted to a full-time offer after seven months.

PROJECTS

Nubify

Python, AWS Pricing API

- Final degree project. A CLI to start on AWS with real cost estimates before anything is created.

Personal site

Astro, TypeScript, Cloudflare

- Pinned dependencies behind a seven-day quarantine, strict CSP, signed commits, and Prowler scanning its own repository.

TECHNICAL SKILLS

Languages Python, TypeScript, Java, C/C++, SQL, Bash

Cloud AWS, Azure, Google Cloud, Microsoft 365, OpenStack, Okta, MongoDB Atlas, Oracle Cloud

Infrastructure Docker, Kubernetes, Terraform, Linux, networking

Security Cloud posture management, detection engineering, IAM, attack paths, CIS Benchmarks, DISA STIG

AI AI-assisted development, LLM workflows, agents and skills

Tools Git, GitHub Actions, pytest

ACHIEVEMENTS

- Sixth of 398 contributors to Prowler by commit count, on a project with 14.8k stars.
- Lead the detection and remediation team.
- Maintain the open-source community: issue triage, pull request review and Slack support.
- Speaker at Hackén, Jaén, two consecutive years. Attended AWS re:Invent, fwd:cloudsec and RootedCON.
